The on-site practical assessments are conducted on a regular basis in each State and will be discussed prior to enrolment into the course.

COST

\$595.00 – GST free.

CONTENT

- Prepare for the task
- Complete on-site preparations and safely set up the site
- Undertake Vacuum Excavation activities
- Hazard identification & risk assessment
- Complete job documentation

OUTCOME

On the successful completion a Statement of Attainment for RIICCM303 – Conduct vacuum excavation is issued.

Vacuum excavation is a non-destructive digging technology that improves the safety of workers on site, is more cost effective and importantly, vacuum excavation is significantly more environmentally friendly than conventional digging machinery.

This short course provided by Locating Unlimited ensure adequate and professional training for our learners in the safe and competent operation of Vacuum Excavation equipment within a civil construction environment.

Our Vacuum Excavation course includes the following sections:

- Planning a job
- Safety and risk management
- Operation of the vacuum and water jetting system
- Signage, barricading, and exclusion zones
- Start-up and shut down procedures

Much of the course is delivered on-line, which can be completed at times that suit the individual learner.

However, there are practical activities, including practical assessment, which will be completed on the job at a suitable worksite. This will include the operation of the equipment on a worksite.
