

NWPNET029 – Locate, identify and protect utilities – Advanced GPR

DURATION

This course is delivered face-to-face over one day with, GPR theory, data processing and report writing.

WHEN and WHERE

Various locations within Australia and New Zealand – delivered approx. each year – Contact Locating Unlimited to be places on our wait list.

COST

\$795.00 – GST free.

WHAT YOU WILL LEARN

- A full understanding of the principles of GPR
- What to look for when considering GPR or evaluating performance claims
- The future of GPR technology, ranging from large array systems to drones and autonomous driving vehicles
- How GPR data is collected in different environments, ranging from large mineral exploration projects to scanning of concrete slabs
- How to process and interpret GPR data using provided sample datasets as well as data collected on site
- Access to a comprehensive cloud-based geophysical processing platform (Geolitix) for two months
- How to compile and present Reports to project-based clients

OUTCOME

On the successful completion a Statement of Attainment for NWPNET029 - Locate, identify and protect utilities is issued.

Train With the Best to be The Best

When not travelling the world conducting GPR investigations for multi-national mining conglomerates, or processing their data, or running his two successful corporations – Groundradar and Geolitix, or delivering Insightful lectures at universities and Conferences, or composing one of his 32 published works, or consulting with the team from RMIT about designing a GPR for the next moon landing, or running a Marathon somewhere, you can find Dr Jan Francke relaxing at home on the beautiful Vancouver Island Canada.

This is a rare opportunity, to learn from one of the most experienced and highly credentialed GPR practitioners in the world.

These courses are only available to existing Utility Locating Professionals, who currently operate in the field using other locating technologies to locate underground utilities. Professionals wishing to upgrade their skills and knowledge will be able to provide a wider range of services to their clients.

With your existing skills (once verified), and on the successful completion of this training we will be able to issue a Nationally Recognised Statement of Attainment – NWMNET029 – Locate, identify and protect utilities.
