- Correct ground marking

OUTCOME

On the successful completion a Nationally Recognised Statement of Attainment for NWPNET029 - Locate, identify and protect utilities – Basic GPR is issued.

At Locating Unlimited you TRAIN WITH THE BEST TO BE THE BEST

For years industry has needed a course to train GPR operators in the correct methods for using this highly sophisticated equipment.

Ground Penetrating Radar is an additional tool that today's Locating Technician has available to them to unravel the mysteries of our complex underground utility network.

Coupled with EM (Electro Magnetic) locating equipment, BYDA Asset owner plans, visual observation, and local knowledge, GPR complements the locator's arsenal of detection methods.

Any equipment, irrespective of cost is totally useless without correct training. Locating Unlimited, an RTO which focuses on utility damage prevention is recognised at the forefront around technical training for locating technicians.

Please note – this course is not open to everyone. There are strict pre-requisite requirements placed by Locating Unlimited, to ensure that at the end of the training you have all of the knowledge that the Unit of Competency requires.

So, if you are a Locating Professional, with the required existing training and wish to step up to this wonderful technology and offer your clients this added level of professionalism, enrol now.

This training is delivered by industry professional with extensive field experience coupled with years of training delivery. Course numbers are strictly managed to ensure optimum learner/trainer ratios.

With your existing skills, and on the successful completion of this training we will be able to issue a Statement of Attainment – NWPNET029 – Locate, identify and protect utilities – Basic GPR.
